CAREER OBJECTIVE

Full Stack Web Developer (MERN) who has built a real-time messaging app with end-to-end encryption and passwordless OTP login, and a role-based rental platform with REST APIs. B.Tech CSE student (graduating 2027) seeking a software developer role to build responsive, scalable web applications.

SKILLS

Languages: C++, JavaScript, Python

Frontend: HTML, CSS, React, Tailwind CSS, Bootstrap, Framer Motion

Backend: Node.js, Express.js, REST APIs, JWT Authentication, Socket.io (WebSockets), Nodemailer

Databases: MongoDB (Mongoose), MySQL

Tools: Git, GitHub, Cloudinary, Web Crypto API

Core: Data Structures & Algorithms, Authentication & Authorization, Responsive Web Design, Full Stack Development

EDUCATION

B.Tech, Computer Science & Engineering | 2023 - 2027

Shri Shankaracharya Institute of Professional Management and Technology, Mujgahan, Raipur

12th Grade, State Board | May 2022 - April 2023

Swami Atmanand Government English School, Nayapara, Bagbahara

PROJECTS

Full-Stack Real-Time Chat Application | [GitHub](#) | [Live Demo](#)

React.js, Node.js, Express.js, MongoDB, Socket.io, Tailwind CSS, Cloudinary, Framer Motion

- Built one-to-one and group messaging with Socket.io WebSockets, so messages arrive in real time.
- Implemented RSA-2048 + AES-256-GCM hybrid encryption on the client, so the server never sees plaintext.
- Built passwordless OTP login with JWT in HTTP-only cookies, using Nodemailer and Brevo for email delivery.
- Built encrypted file sharing with the Web Crypto API and Cloudinary, compressing files before upload.
- Added online/offline status, last seen, typing indicators, read receipts and node-cron scheduled messages.
- Animated the UI with Framer Motion and emoji-picker-react for a more expressive messaging experience.
- Designed a normalized MongoDB schema and used Mongoose populate() to fetch related data efficiently.

Airbnb Clone - Full Stack Web Application | [Live Demo](#)

HTML, CSS, Tailwind CSS, Node.js, Express.js, MongoDB

- Built a full-stack rental platform with Node.js, Express and MongoDB, with Admin, Host and User roles.
- Developed REST APIs with Express.js and MongoDB to manage listings, bookings and users.
- Secured login and protected routes using Bcrypt.
- Designed a responsive Tailwind CSS interface that works on both mobile and desktop.

Food Website - Frontend Project | [GitHub](#)

HTML, CSS, Bootstrap, JavaScript

- Built a responsive frontend with HTML, CSS and the Bootstrap grid system.
- Added JavaScript menu filtering and form handling to make the site interactive.
- Used semantic HTML and optimized CSS to focus on performance and accessibility.
